**Healthcare  
Day of Action  
September 14,  
2024**

Alberta workers are the backbone of our economy, but the rising cost of living has put immense strain on families. Over the past decade, inflation has surged by 30%. Healthcare workers have lost \$114 per week in real wages since 2013. Workers need a better deal now.

Workers in the Healthcare sector have had enough of low wage gains, crises in staffing and retention, and ongoing bids to privatize healthcare services that put patients and workers at risk. Join Waging Ahead as we fight for a better deal for workers across Alberta.
